

ADCO Capsule 80
The Art Of Conversation

A2-22

ADCO Capsule 80

Designed by top flight architects and engineers for high-traffic locations like Houston's Intercontinental Airport, Capsule 80 takes visibility to new heights.

Its sculptural form can stand alone as the center of attention, in just 1½ square feet of floor space. Or these shimmering columns can be arranged in groupings or rows that define interior spaces with visual effects that are as stunning as they are functional.

Best of all, Capsule 80's stainless steel construction and smooth finish meets ADA* requirements beautifully.

Dimensions: 80 inches high with an outside diameter of 18 inches.

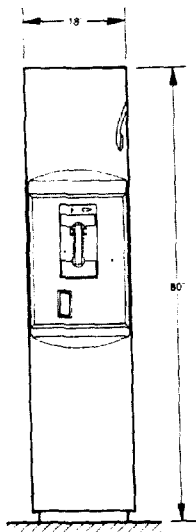

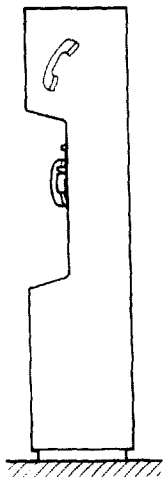

STANDARD FEATURES:

- Perforated "handset" design in upper column.
- Stainless steel finish with all joints ground and polished.
- Phone facia converts various phone sets to the panel phone look at 54" coin slot height.
- Sloped stainless steel shelf.

OPTIONS:

- 48" coin slot height when special ADA* access requirements must be met.
- Illumination can be added above phone-set.

* Americans with Disabilities Act — The standards for accessibility for the physically challenged are constantly evolving. To meet these changing requirements ADCO offers a full range of specially designed enclosures or options to existing designs that assure they meet the current criteria.

ADCO Model 105
It's Got the Look!

ADCO Model 105

It's Got the Look!

Create the look you need using the Model 105. Whether the enclosure needs to blend subtly with the decor or advertise its presence, the Model 105 can be adapted for your application, indoors or out.

Begin with the distinct styling of the standard model featuring solid side walls, and create your own image by adding standard or custom side panels of glass or lexan, an ornamental ball top, or customized front and rear lighted signage.

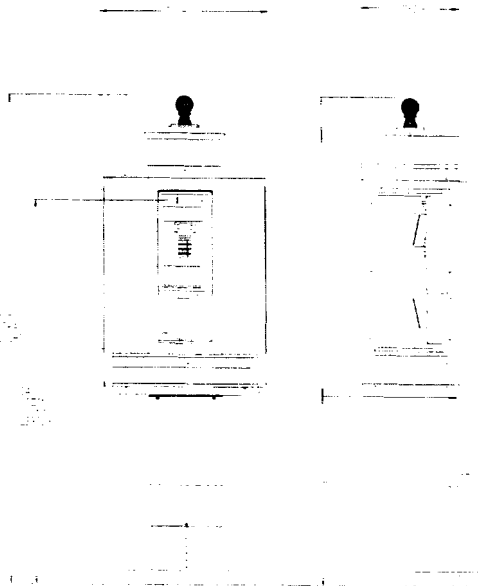

STANDARD FEATURES:

- Lighted front and back "Phone" signs, as well as interior fluorescent light, for added visibility.
- Sloped stainless steel shelf to avoid collection of debris.
- Mounts on universal pedestal, no special pedestal required, or can be installed using universal wall mounting bracket.
- Built-in directory mounting bracket for easy, economical installation.
- Rust-free aluminum housing with graffiti-resistant black finish.
- Recessed phone cavity for added protection for the phone.
- Complies with current ADA* standards and is U.L. and CSA listed.

OPTIONAL FEATURES:

- Side panels of clear glass or lexan which can be screened with traditional handset or custom graphics.
- Ornamental ball top can be added to lend colonial styling.
- Back-to-back adapter bracket available for mounting two booths on one pedestal.
- Custom booth colors.
- Directory facilities, lighted signs, masts and sign holders.

* Americans with Disabilities Act — The standards for accessibility for the physically challenged are constantly evolving. To meet these changing requirements ADCO offers a full range of specially designed enclosures or options to existing designs that assure they meet the current criteria.

ADCO Model 115BF-U
Outdoor Phone Enclosure

Phone

A2-28

ADCO Model 115BF-U Outdoor Phone Enclosure

Rugged, handsome and versatile. Model 115 is the outdoor enclosure that can do double duty in any setting from the high Sierras to high rises.

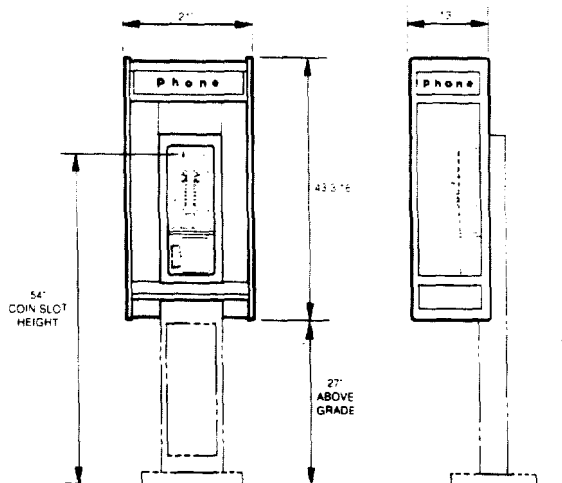

First, it's a full surround enclosure that gets the phone out of the weather and provides privacy for the patron. And second, its custom graphics and color options provide additional outdoor signs to promote business.

FEATURES:

- Intermediate size, rustproof aluminum booth for wall or post mount.
- Standard side panels constructed of durable tempered safety glass.
- Rear wall comprised of a sound absorbing blanket, clad with perforated aluminum for caller convenience.
- Interior overhead light and 4-way exterior fluorescent signs increase visibility and use.
- Graffiti resistant paint in standard colors of blue, red, bronze and satin or dark bronze anodized finish.
- Sloped stainless steel writing shelf to reduce collection of debris.

OPTIONS:

- Custom colors.
- Directory facilities, lighted signs and masts.
- Side panel Viewtels with custom graphics for site signage or advertising.

ADCO 201 Series Enclosures and SSP52 Pedestal

ADCO 201 Series Enclosures and SSP52 Pedestal

ADCO 201 Series Enclosures and SSP52 Pedestal are designed to securely protect your investment, create a visible and inviting environment, and install simply and economically.

The ADCO **EASINSTALL** features of the enclosure and the pedestal reduce the cost of installation. From the optional pedestal base plate that mounts over pre-existing bolts, to the standard feature that securely mounts the booth to the pedestal without the gymnastics required with other booths. ADCO watches your costs of installation as closely as you do.

MODEL 201 (Front "Phone" Sign Only) and 201A (Four-Way "Phone" Signs)

- Aluminum enclosures with satin graffiti resistant finish for years of low maintenance use.
- Perforated handsets on sides of booths for added visibility.
- ADA compliant when mounted on pedestal or wall.¹
- **EASINSTALL** features allow the booths to be installed quickly and securely.
- **EASINSTALL** allows the booths to be changed without removing the phone and without disassembling the pedestal.
- Either unit can be installed on ADCO's ValuPed 2000 (fixed aluminum), ASP-UA1 (adjustable aluminum), SSP52 (fixed steel), List 143 and other pedestals.

OPTIONS FOR 201 AND 201A

- Model 201 available with three styles of diffusers.
Standard: All lexan with "Phone" graphics.
Optional: All metal with "Phone" decal for non-illuminated booths.
Optional: Combination metal and lexan diffuser providing added protection for the signage, but allows the booth and phone to be illuminated.
- Both models available with low voltage lighting.
- Custom booth colors available on special order.
- Bracket available for mounting two booths back-to-back or for wall mounting enclosures.

ADCO SSP52 PEDESTAL

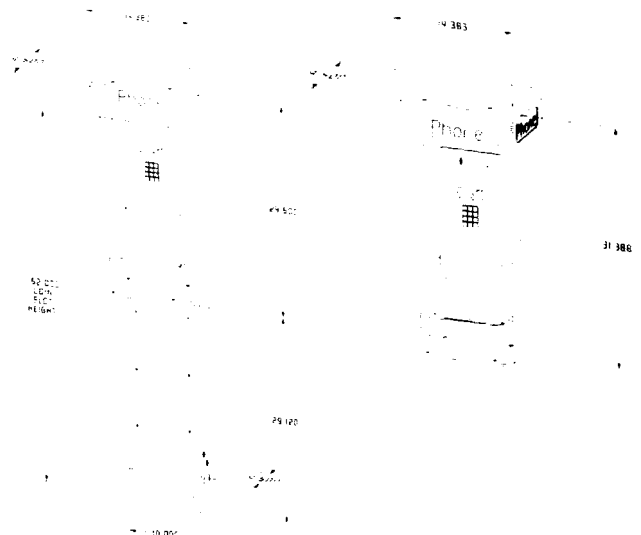

- 12 gauge steel pedestal with black graffiti resistant paint — resists rusting and vandalism.
- Strong, yet light enough for one person to install.
- Mounts telephone between 52" & 54" coin slot height for ADA compliance on unlevel surfaces.
- Optional electrical and photocell kits available.
- Optional **EASINSTALL** baseplate for low cost installation over pre-existing bolts.
- Mounts booths that fit on universal pedestals.
- **EASINSTALL** design allows the M201/201A to be installed without bolting to pedestal top. Additionally, the M201/201A (non-lighted) can be installed without removing the pedestal front cover.

¹ When mounting the M201/201A on a wall, the phone must be mounted at 49.9" coin slot height to meet the 27" cane sweep height requirement.

ADCO PANEL HOUSINGS

Always the Perfect Accent.

AZ-37

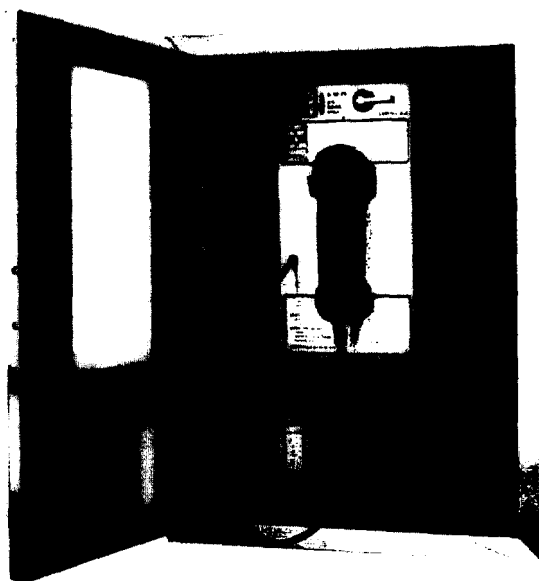

The first choice where space is at a premium.

Whether you choose a surface, semi-recessed or flush mounting, our panel housings are the ideal choice for locations where a public phone is a must, but floor space is limited.

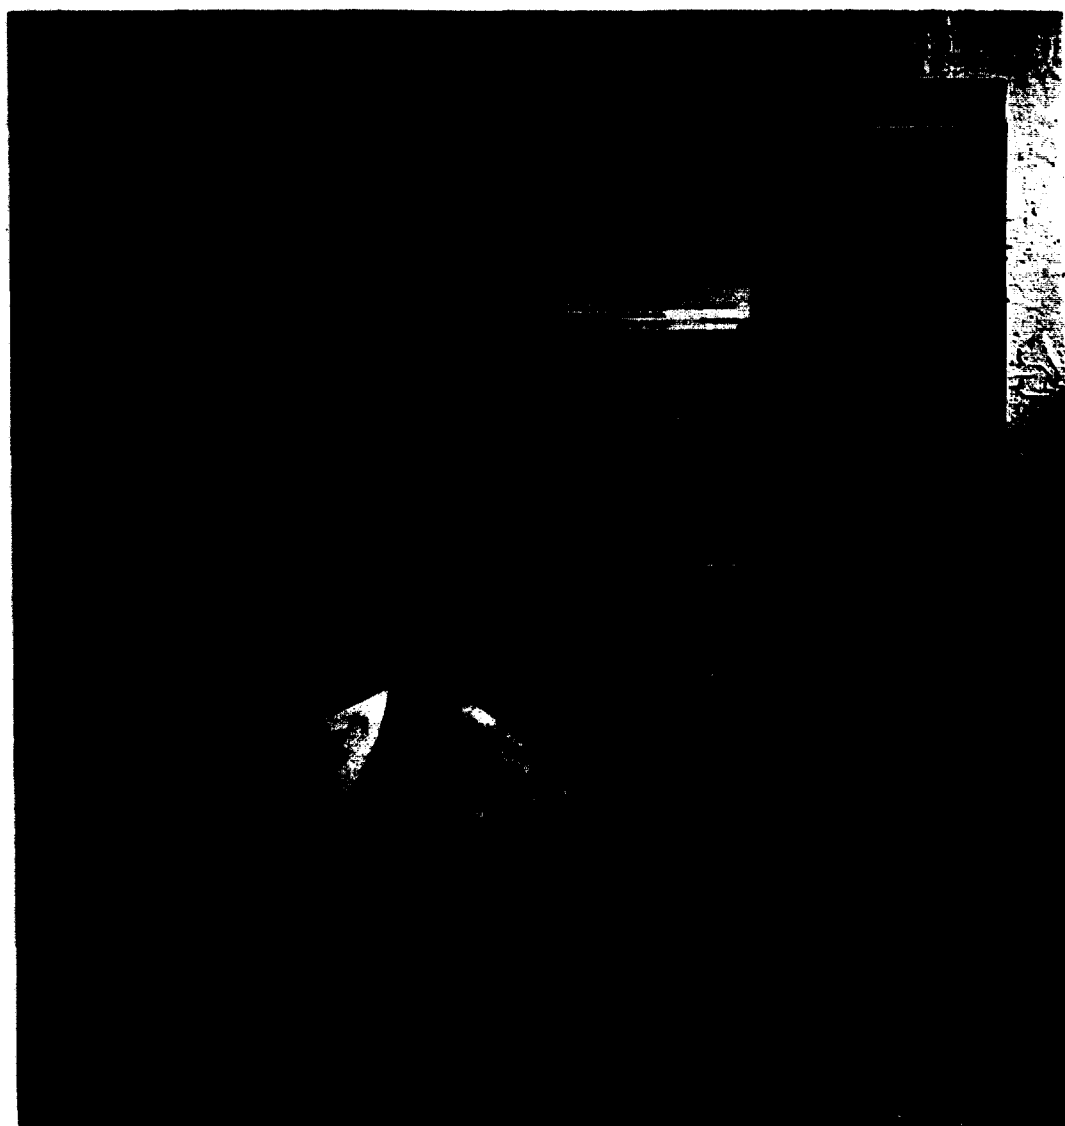

ADCO's economical, classic panel housings are available to convert virtually any phone you are installing to the sleek panel-phone look. These beautifully finished enclosures can be specified in colors to complement virtually any interior design, including brushed stainless steel, dark bronze or brass-tone.

ADCO panel housings offer you the utmost in flexibility. Designed to accept virtually any pay phone set available today, their rugged construction and finishes give you the most economical way to gain the sleek panel-phone look and years of trouble free service. ADCO panel-housings can even be combined with other ADCO enclosures for an enhanced appearance and improved equipment security at low cost.

ADCO's fully recessed panel housings provide full compliance with the Americans with Disabilities Act (ADA) with their smooth protrusion-free surface. Optional cane sweep kits and shelves for portable Telephone Devices for the Deaf (TDD) are available for surface and semi-recessed housings when special requirements need to be met.

A2-39

ADCO PANEL HOUSINGS

FEATURES:

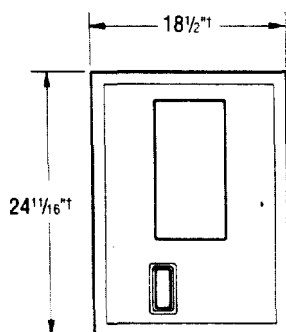

- Housing and door cover available to economically convert any public coin phones, including Bell, Automatic Electric (GTE), Centurian, Charge-a-Call, Protel, and Millennium sets to a panel phone.
- All-metal, welded construction with ground and polished joints for a smooth finish.
- Color options to accent any decor, including brushed stainless steel, dark bronze and brass-tone.
- Housings available for surface, semi-recessed, or fully-recessed mounting, reducing space required for installation.
- Worry-free security device for locking telephone into housing.
- All ADCO models are designed for full ADA compliance, so your choices for type and style, even in custom designs, are unrestricted*.

OPTIONS:

- Directory facilities available for caller convenience.
- Portable TDD** shelves and cane sweep kits for ADA compliance can be added to new or existing installations.

* The standards for accessibility for the physically challenged are constantly evolving. To meet these changing requirements ADCO offers a full range of specially designed enclosures or options to existing designs that assure they meet the current criteria.

** TDD - Telephone Device for the Deaf.
